physics, chapter 31: forces on moving charges and currents - 574 forces on moving charges and currents §3j-j we may consider equation (31-2) as a definition of b . from the above equation we see that if v is parallel to b , the force on the moving charge is zero. this suggests a method of determining the direction of b by use of cathode-ray tubes. **chapter 1 ultrasound physics - jeff ascenzo** - edelman · ultrasound physics ultrasound physics · 5 amplitude concerned with the strength of a sound beam. definition the difference between the average value and the maximum value of an acoustic variable. **chapter 5: diffusion - physics and astronomy** - 1 chapter 5 chapter 5: diffusion diffusion: the movement of particles in a solid from an area of high concentration to an area of low concentration, resulting in the uniform distribution of the substance diffusion is process which is not due to the action of a force, but a result of the random movements of atoms (statistical problem) 1. diffusivity and 2 fick's laws **chapter 6 electron transport - condensed matter physics** - \dot{s} must vanish for negative t ; from which the fourier relation eq.
